SOC113 - Suspicious hh.exe Usage

44

Malware >> ✓

EventID :

44

Event Time :

Jan, 31, 2021, 04:59 PM

Rule :

SOC113 - Suspicious hh.exe Usage

Level :

Security Analyst

Source Address :

172.16.17.47

Source Hostname :

BillPRD

File Name :

WinRAR.chm

File Hash :

07694464c25bac4ecdb365e928ffe1ff

File Size :

306 KB

Device Action :

Allowed

File (Password:infected) Download :

Malware – (malicious software) software designed to harm a computer or computer network

Include: Viruses, worms, Trojans, Ransomware, spyware

What is the threat indicator for this attack - unknown or unexpected services configured to launch automatically

hh.exe- Windows HTML Help executable

often abused by malware to execute .chm (Compiled HTML Help) files containing malicious scripts

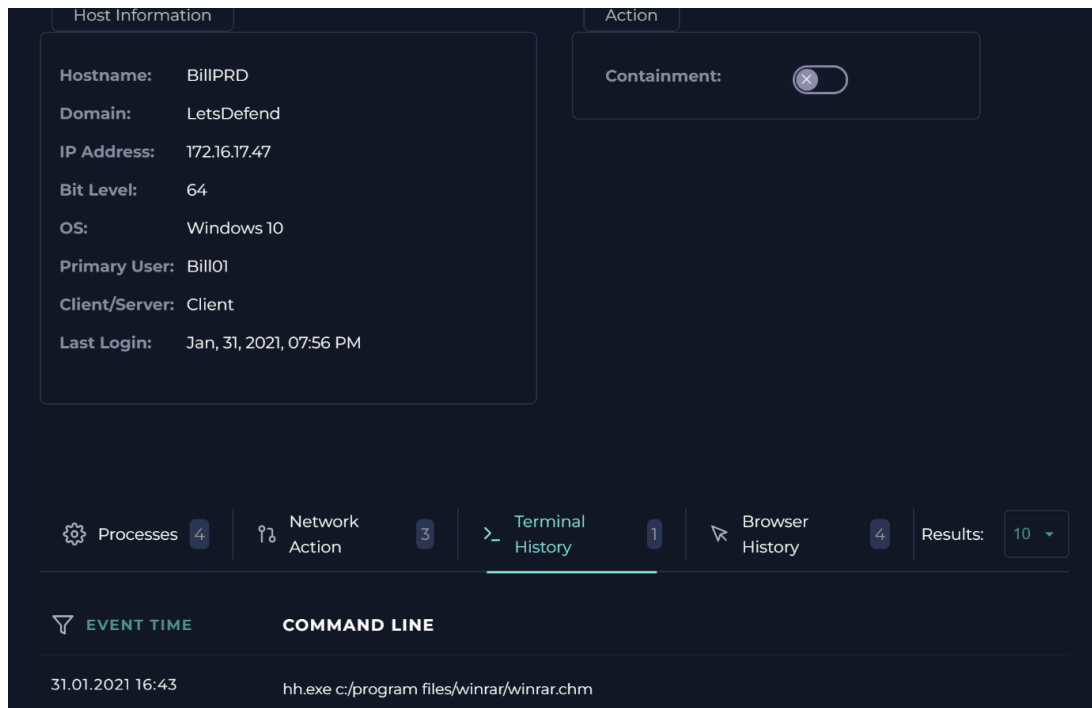

Check if the malware is quarantined/cleaned

- Log Management – provides access to all logs in an environment and allows management of the logs in one place.

- Endpoint Security – all security measures used to protect endpoint devices

- Endpoint detection & response - specific type of endpoint security that provides continuous monitoring, detection, investigation, and response capabilities for advanced threats.

Containment – Isolate a hacked machine from the network

Analyze malware in 3rd party tools and find C2 address

Using virustotal (<https://www.virustotal.com/gui/home/upload>) - upload the source Ip address

Using URLHouse

(<https://urlhaus.abuse.ch/browse.php?search=07694464c25bac4ecdb365e928ffe1f>) – upload the File Hash

- By the results it is non-malicious
- The attack is a false positive
